Link: [Portfolio Site](#)

Summary: A responsive personal portfolio website showcasing my web development projects, skills, and experience. Built with Next.js and deployed on Vercel.

Key Features:

- **Project Display:** Showcases various web development projects with detailed descriptions and links to live demos and GitHub repositories.
- **Responsive Design:** Ensures optimal viewing experience across different devices and screen sizes.
- **Reviews Section:** Includes customer reviews with dynamically fetched data using the Context API.
- **Navigation:** User-friendly navigation and smooth scrolling for a seamless user experience.

Responsibilities:

- **Design and Development:** Created the entire website from scratch, including design and front-end development.
- **Context API Integration:** Implemented Context API for centralized state management of project and review data.
- **Deployment:** Deployed the application on Vercel, ensuring continuous deployment and smooth performance.
- **User Interface:** Designed and implemented a modern and responsive user interface using Tailwind CSS.
